

# Things to consider before you decide to transfer

the  
people's  
pension

What type of other pension scheme do you have?

DC / defined contribution /  
money purchase

DB / final salary /  
defined benefit / CARE /  
career average

It is generally inadvisable to transfer this kind of benefit. You should take appropriate authorised advice before proceeding.

Are you paying  
high charges?

**Information:** Today's pension schemes tend to have lower charges than older ones. If you set up your pension before stakeholder pensions were introduced in 2001 with charges in them being capped – you could be paying very high fees.

**Consideration:** What charges are you paying on an existing scheme and how do they compare to charges if you transferred?

Investment  
performance

**Information:** One of the key factors affecting the income you get from your pension is investment performance. The performance of your pension savings really does matter as it directly affects the income you get in retirement. It's important to ensure you have sufficient savings to see you through your retirement years. Of course, past performance is no guide to the future, but you should aim to make your investments work as hard as possible.

**Consideration:** How are your current investments performing and how does this compare to the performance of the funds you're considering transferring to?

Will you suffer any  
transfer penalties?

**Information:** Most pensions can be transferred without exit penalties or charges, but it's important that you find out if any charges and penalties could be applied to your pension on transfer. Some charges are only applied to transfers early in the life of the pension scheme.

**Consideration:** What is the total value of any charges or penalties applied to the pension transfer? You should weigh up the potential for greater growth against the impact of any charges and penalties.

Is your current  
scheme invested  
in with-profits?

**Information:** A with-profits fund is designed to smooth out investment returns by setting aside some of the profits from years where the returns are good to provide bonuses in years where the returns are poor. Sometimes, when you want to transfer your pot, a charge known as a market value adjustment (MVA) might apply. An MVA is usually expressed as a percentage of your pension pot and can reduce your transfer value.

**Consideration:** If you find you have an MVA in force at this time, you may wish to seek advice or delay transferring until the MVA is no longer being applied.

Does your  
current scheme have  
Guaranteed Annuity  
Rates (GARs)?

**Information:** A GAR is a minimum rate at which your pension pot must be converted into an income. These rates are typically much more generous than the rates available on the open market today. GARs are normally lost on transferring out of your existing scheme.

**Consideration:** It is important to weigh up the potential for greater growth and lower charges against the likelihood that your annuity rate will be lower.

Are you planning to  
access your pension in  
the next 5 years?

**Information:** To take a small pot of £10,000 or under from The People's Pension, there must have been no transfers in within the last 5 years. However there are some circumstances where you could still take your small pot. Contact us for more information on these rules.

**Consideration:** If you are thinking about taking a small pot within 5 years, please ensure this is something you consider. Taking a pot of over £10,000 or transferring to another provider to take an income wouldn't be affected.

Will your normal  
minimum pension  
age be affected?

**Information:** Some schemes have a protected pension age – your new scheme may not be able to administer this and you may lose the option of taking your savings from age 55 after 6 April 2028.

**Consideration:** Moving your pot may mean that you'll need to wait up to 2 years longer to access your money after 6 April 2028. Find out more at [thepeoplespension.co.uk/minimum-pension-age-change](https://thepeoplespension.co.uk/minimum-pension-age-change)

The points above should not be considered alone, but related to your own situation and circumstances. Please contact your current provider if you're uncertain of any of the features or benefits of your existing scheme. If you're unsure if transferring is right for you, please contact an authorised financial adviser.

# Some facts about The People's Pension

## The benefits of transferring your pension

There are a number of reasons why you may want to consider moving your existing pensions to The People's Pension Scheme:

**Our annual management charge** - with The People's Pension, there is an annual management charge (AMC) made up of 3 elements:

- An **annual charge** which we'll deduct from your pension pot, if you've been in the scheme long enough. We'll only apply an annual charge if we calculate that you'll have a pot size of £100 or more after the charge is taken.
- A **management charge** of 0.5% of the value of your pension pot each year – just 50 pence a year for every £100 in your pension pot.
- A **rebate** on some of the management charge depending on how much is in your pot, helping you save more for later life. When you transfer in from another scheme, you may not be eligible to receive a rebate on the money transferred in until the next rebate period.

All the investment funds and profiles are proactively kept under review by the Trustee on behalf of the members. **One pension pot** – having only one pension pot means that you will receive only one set of annual paperwork, and one online log-in, making it easier for you to keep track of your pension pot. With The People's Pension you can keep that pot for life and even if you leave your current employer or become self-employed you can continue to contribute to it.

**In safe hands** – The People's Pension is an authorised master trust scheme run by an independent corporate Trustee that has responsibility for looking after all aspects of the scheme. The Trustee will ensure it is run in the best interests of its members, and in accordance with the rules and the law, as well as making sure that the investment options are appropriate and the administration is first class.
